

I. NS2 based NETWORK SECURITY

1. Malicious and selfish behaviors represent nodes misbehavior in a MANET (IEEE 2013).
2. Ornamental safety measures for Mobile Adhoc Networks by using ECC base Cryptography. (IEEE 2013)

II. NS2 based QUALITY OF SERVICE

1. Reliable Neighbor Based Multipath Multicast Routing in MANETs.(IEEE 2013).

III. NS2 based LOCATION TRACKING

1. Location tracking in mobile ad hoc networks using particle filters. (IEEE 2013).

IV. NS2 based PROTOCOL ANALYSIS

1. A recital analysis and association of various routing protocols in MANET.(AODV,DSDV,TORA). (IEEE 2013).
2. Presentation Evaluation of a Multicast Routing Protocol for Wireless Mesh Networks in view of Network packs.(IEEE 2013).
3. A concert analysis and assessment of different routing protocols in MANET.(AODV,DSR). (IEEE 2013).
4. A piece analysis and similarity of an assortment of map-reading protocols in MANET.(AODV,AOMDV).(IEEE 2013).
